DisplayPort Cables
DisplayPort to DVI-D Cables

Part No: See Chart

View Online ➤

The range of DisplayPort to DVI-D cables support the link from a PC featuring the DisplayPort interface to displays featuring DVI-D connectors. This pure digital transmission of signal ensures picture quality, however, DVI-D does not support audio as standard so additional cabling may be required for audio. Please note, suitable only for DispalyPort signals from source device.

Features & Benefits

- Features standard 24 pin DisplayPort connector to DVI-D connector
- Fully moulded connectors provide tamper free durable design
- Competitvely price without compromise to quality
- Supports Digital Video data transfer only (Not Audio)
