

USB Display Adaptors

USB to DVI/SVGA Display Adaptor

Part No: 2494DHD

[View Online](#)

This USB Display Adapter enables you to connect one more monitor, LCD or projector to a computer with a USB 2.0 port. For desktop users adding an extra monitor via USB connection is easier than ever without having to open the computer chassis to install an internal video card. Once the installation is done, the USB-attached monitor soon wakes up. No function key hassle to swap a second monitor.

With this handy adapter, you can enjoy many benefits brought by an add-on monitor. The most obvious one is that you get more desktop area to have more applications visible at one time. No more stacking windows within the confines of a single display. It is also possible to span an application, e.g. spreadsheets, across two displays. What's more, the adapter is hot pluggable. If you are not using the extra monitor, just unplug the adapter at any time; no reboot needed.

System performance is an important issue when using multiple monitors. Another benefit of this adapter is that it uses little computer resource, ensuring users get quality display without comprising computer performance.

Features & Benefits

- Add-on monitor, LCD or projector through a single USB 2.0 port.
- Hot-plug; add or remove monitor without system reboot.
- Small in size, works with all VGA/DVI-I displays.
- Supports High Resolution up to 1920x1080.
- Video streaming is supported up to 1080p.
- Extend and Mirror mode support.
- Resumes from hibernation and suspend modes.
- Supports up to 6 USB display adapters to work simultaneously.
