

Floor Boxes & Floor Grommets

Floor Boxes

[View Online](#)

Raised floor boxes are used to connect the sub-floor to the desk via the raised floor itself, power and data are separated into compartments and fed out under a purpose built lid. Each unit comes with 2-switched UK power sockets and a 4-way data plate with 6C cut-outs as standard. Custom accessory plates can be made to order, such as red power plates used to distinguish separate power supplies.

Fixing brackets and floor template are supplied with each unit.
